FOR IMMEDIATE RELEASE:

Proximex™ Certifies Surveillint™ with AMAG Technology under Symmetry Extended Business Solutions Program

WESTFORD, MA. September 9, 2013 — Proximex, part of the Security Products business unit of Tyco, announced today that it is now a member of AMAG Technology's Symmetry Extended Business Solutions Program. Proximex achieved this milestone by certifying its Proximex Suveillint integration module with AMAG's Symmetry™ v7.0.1 Security Management System, which combines its Physical Security Information Management (PSIM) solution with AMAG's newest version of Symmetry access control software. AMAG and Proximex cooperatively tested and certified this integration.

"We welcome Proximex to the Symmetry Extended Business Solution program, and are excited to provide this award-winning PSIM product integration to our customers," said Symmetry Extended Business Solution, Program Manager, Shae Taylor.

"We are thrilled that Proximex is now fully certified by AMAG and listed as a member of AMAG's Extended Business Solutions program," said Larry Lien, vice president of product management for Proximex. "Partnerships with important solution providers like AMAG provide customers with more options to increase visibility of their security systems, and the bi-directional communication between Surveillint and AMAG significantly improves incident response times."

The Proximex Surveillint Integration Module for AMAG™ Symmetry™ enables Proximex Surveillint™ to bi-directionally communicate and integrate with the AMAG Symmetry Security Management System. With this integration module, alarms generated from Symmetry are delivered, synchronized and displayed through the Surveillint client software user interface. AMAG Symmetry devices and associated alarms can be connected and correlated with other related sensors, such as live video, recorded video, maps, and response tasks, giving the operator a single view to manage a security incident. The Integration Module enables the Symmetry devices to be viewed as icons on the map and also provides the ability to remotely control the Symmetry devices (lock, unlock, enable, disable) through the Surveillint client. Badge user information including investigate user and search capabilities are also provided through this integration for the operator to quickly and easily track and review personnel access activity.

The Integration module utilizes the AMAG SMS XML Interface and supports Symmetry 7.0.1 Enterprise, Professional and Homeland Security editions.

About Proximex
Proximex, a leader in physical security information management (PSIM) solutions, is part of the Security Products business unit of Tyco, the world's largest pure-play fire protection and security company. Proximex solutions integrate existing and new systems and technologies in a centralized command and control center to ensure that incident information is no longer trapped within disparate systems, but brought together in context with security policies and operations for analysis and resolution. Global customers operating in a variety of mission critical environments trust Proximex solutions to deliver the fastest set up and deployment, the highest in scalability, availability and failover capabilities, and the most robust integrations in the industry. Leveraging the brand's IT heritage, Proximex solutions integrate physical and logical security systems with network and health monitoring technologies to catch multi-pronged attacks and relay important business-level information. Proximex has serviced more than 250 bi-directional global integrations and covers all the major global continents, North and South Americas, Europe, the Middle East and Asia.

A system integrator can contact Proximex sales at 408-215-9020 or sales@proximex.com, or visit www.proximex.com. For information about the Symmetry Security Management System integration with Proximex (Surveillint) contact your AMAG Regional Sales Manager, call 310-518-2380 or visit www.amag.com.
