FOR IMMEDIATE RELEASE:

Proximex and Inovonics Partner to Provide More Accurate Picture of the Security Environment

WESTFORD, MA. September 20, 2013 — Proximex™, part of the Security Products business unit of Tyco, announced today the integration of its Surveillint™ solution with Inovonics' (<http://www.inovonics.com>) EchoStream® EN6080 Area Control Gateway (ACG). With this new collaboration, users can manage security incidents more efficiently through a centralized view of security activity and improved incident response in buildings or on campuses.

The EN6080 ACG is the industry's first Physical Security Interoperability Alliance (PSIA) compliant intrusion control device that provides IP-based interoperability with leading access control, video and area control systems. Proximex, also a PSIA-compliant solution, worked with Inovonics to quickly and easily integrate the company's wireless intrusion endpoints into the Surveillint PSIM solution using the EN6080 ACG. Through this partnership, end users can see a vastly more accurate picture of the security environment, allowing them to time stamp and assemble events to anticipate, dissect and respond to threats as they evolve.

"With the Area Control Gateway, Inovonics is providing products that seamlessly enhance partner solutions," said Mark Jarman, president of Inovonics. "By integrating our solution with Proximex's Surveillint, end users experience multi-sensor event confirmation, improved incident response and multiple functionalities that allow them to view a vastly more accurate picture of the security environment and more effectively manage their response protocols."

"Proximex Surveillint was designed with an architecture that integrates information from many disparate security systems," says Larry Lien, vice president of product management at Proximex. "Our partnership with Inovonics augments our capabilities for end users to individually select leading industry standardized products and easily use them together, which ultimately helps them connect information from a number of systems faster, and more appropriately."

About Proximex

Proximex, a leader in physical security information management (PSIM) solutions, is part of the Security Products business unit of Tyco, the world's largest pure-play fire protection and security company. Proximex solutions integrate existing and new systems and technologies in a centralized command and control center to ensure that incident information is no longer trapped within disparate systems, but brought together in context with security policies and operations for analysis and resolution. Global customers operating in a variety of mission critical environments trust Proximex solutions to deliver the fastest set up and deployment, the highest in scalability, availability and failover capabilities, and the most robust integrations in the industry. Leveraging the brand's IT heritage, Proximex solutions integrate physical and logical security systems with network and health monitoring

technologies to catch multi-pronged attacks and relay important business-level information. Proximex has serviced more than 250 bi-directional global integrations and covers all the major global continents, North and South Americas, Europe, the Middle East and Asia.

For more information about the Inovonics EN6080 Area Control Gateway integration with Proximex (Surveillint), contact Proximex sales at 408-215-9020 or sales@proximex.com.

About Tyco Security Products

Tyco Security Products and its leading brands conducts business in over 177 countries around the world, in multiple languages and employs over 2,800 employees globally, including research and development, marketing, manufacturing, sales, service and logistics teams in the Americas, Europe, the Middle East, Africa, and Asia Pacific. Our products, built by developers from all product disciplines, consistently allow customers to see more, do more, and save more across multiple industries and segments including healthcare, government, transportation, finance, retail, commercial and residential. Worldwide, Tyco Security Products helps protect 42% of Fortune 500 companies, transportation systems on five continents, 37% of the world's top 100 retailers, over two million commercial enterprises, thousands of students in more than 900 educational facilities, and over five million private residences.

About Inovonics Wireless Corporation

Inovonics is the industry leader in high-performance wireless sensor networks for commercial and life safety applications. Founded in 1986, the company pioneered the use of 900 MHz wireless technology to deliver the most reliable, cost-effective and flexible solutions for critical wireless applications. A leader in security and senior care markets, and the standard for multi-family submetering solutions, the Inovonics family of transmitters, receivers and control modules provides the wireless backbone for many of the world's most widely used wireless systems. Renowned for exceptional performance and reliability, more than 10 million Inovonics wireless devices have been deployed in the most challenging of commercial environments, where structural limitations and multiple wireless networks can prove disruptive to lower quality systems. Working with leading OEMs and service provider partners, Inovonics provides network design and system engineering support to continuously advance the use of wireless technologies for corporate, industrial, government and educational applications. For more information contact Inovonics at (www.inovonics.com), or call 800-782-2709.
