<u>**FOR IMMEDIATE RELEASE:**</u>

New Surveillint Essentials Consolidates System Procedures and Speeds Integration Deployment

The easy to deploy solution from Proximex enables operational control of a multi-vendor security environment with a single user interface

WESTFORD, MA. March 24, 2015 — Proximex, part of the Security Products business unit of Tyco, the world's largest pure-play fire protection and security company, announced the newest release of its Surveillint Essentials solution, which delivers fast and easy security integration deployment for improved efficiency and response.

Surveillint Essentials **consolidates operational control** of multiple security systems into a single graphical user interface. Operators can manage alarms generated by connected systems, view the locations of alarms on maps, click camera icons to see live and recorded video, and send commands directly to connected systems through the intuitive user interface.

"Surveillint Essentials is an excellent option for **small to mid-sized environments** that don't require the full functionality of our enterprise Surveillint Physical Security Information Management (PSIM) solution," said Michael Mesaros, Group Product Manager, Proximex, part of Tyco Security Products. "With a more robust feature set, this latest release enables control room operators to quickly assess incidents and follow custom response protocols based on their location or organization's standard operating procedures, which are critical to effective incident response."

Surveillint Essentials' video console enables operators to access multiple live camera views and automated guard tours, and **take action on connected systems from multiple vendors**, such as cameras, intercoms or security doors. The optional patented E-Z Track video pursuit module lets users quickly locate and track subjects across cameras and video without having to search for cameras or remember specific camera placements.

Surveillint Essentials can be **installed in just minutes**, using a very intuitive configuration wizard and visual designer.

About Proximex
Proximex, a leader in physical security information management (PSIM) solutions, is part of the Security Products business unit of Tyco, the world's largest pure-play fire protection and security company. Proximex solutions integrate existing and new systems and technologies in a centralized command and control center to ensure that incident information is no longer trapped within disparate systems, but brought together in context with security policies and operations for analysis and resolution. Global customers operating in a variety of mission critical

environments trust Proximex solutions to deliver the fastest set up and deployment, the highest in scalability, availability and failover capabilities, and the most robust integrations in the industry. Leveraging the brand's IT heritage, Proximex solutions integrate physical and logical security systems with network and health monitoring technologies to catch multi-pronged attacks and relay important business-level information. Proximex has serviced more than 250 bi-directional global integrations and covers all the major global continents, North and South Americas, Europe, the Middle East and Asia.
