FOR IMMEDIATE RELEASE:

Proximex, Bosch Expand Partnership for Enhanced Integration of VMS, Alarm Monitoring Systems

Alliance spans multiple technology areas to achieve tighter integrations, improved situational awareness

WESTFORD, MA, March 27, 2014 — [Proximex](#), part of the Security Products business unit of [Tyco](#) (NYSE: TYC), announces the continued expansion of its partnership with Bosch Security Systems, Inc. through the integration of its Surveillint™ Physical Security Information Management (PSIM) solution with video management and intrusion detection and control systems from Bosch. These enhancements, which represent integrations with the Bosch Video Management System (BVMS), the company's latest intrusion control panels -- G Series (GV4) and B Series -- and improved support for Conettix D6600 Communications Receivers, continue to add value for joint customers who require the accurate display and correlation of critical information to manage a security incident more efficiently from their PSIM system.

"This partnership with Bosch underscores our desire to continue to collaborate with our partners and innovate in all areas of security, helping Surveillint users to do their jobs more quickly and realize the full value of their security investments," said Chatura Liyanage, Group Product Manager, Proximex. "The new integration with the Bosch video management platform and the continued improvements to the alarm monitoring integrations are significant extensions of that collaboration and innovation."

BVMS 4.5 is an enterprise-class client/server based video management system offering superior alarm handling, and a mobile client for viewing live and playback video. Using Surveillint, which connects and correlates information from disparate systems into one centralized environment, users can manage Bosch video alerts with workflow automation for improved and faster incident response and create event reports for more proactive management of security operations.

Additional integrations between Surveillint and Bosch G Series and B Series panels and the Conettix D6600 Receiver enable end users to receive information from the panels into Surveillint as well as collect, analyze and display detailed alarm information through Surveillint.

"Joining our detailed video streams and reliable alarm communications with data from other systems through Surveillint provides a complete picture of security activity in a single view," says Brad Eck, Integration Manager, North America, Bosch Security Systems. "The partnership with Proximex provides our mutual customers with a higher level of situational awareness to improve how security events are handled and to mitigate risk."

These latest integrations will be demonstrated at the Bosch Security Systems Booth 14051 at ISC West, April 2-4 at the Sands Expo in Las Vegas, Nev.

About Proximex

Proximex, a leader in physical security information management (PSIM) solutions, is part of the Security Products business unit of Tyco, the world's largest pure-play fire protection and security company. Proximex solutions integrate existing and new systems and technologies in a centralized command and control center to ensure that incident information is no longer trapped within disparate systems, but brought together in context with security policies and operations for analysis and resolution. Global customers operating in a variety of mission critical environments trust Proximex solutions to deliver the fastest set up and deployment, the highest in scalability, availability and failover capabilities, and the most robust integrations in the industry. Leveraging the brand's IT heritage, Proximex solutions integrate physical and logical security systems with network and health monitoring technologies to catch multi-pronged attacks and relay important business-level information. Proximex has serviced more than 250 bi-directional global integrations and covers all the major global continents, North and South Americas, Europe, the Middle East and Asia.

About Tyco Security Products

Tyco Security Products and its leading brands conducts business in over 177 countries around the world, in multiple languages and employs over 2,800 employees globally, including research and development, marketing, manufacturing, sales, service and logistics teams in the Americas, Europe, the Middle East, Africa, and Asia Pacific. Our products, built by developers from all product disciplines, consistently allow customers to see more, do more, and save more across multiple industries and segments including healthcare, government, transportation, finance, retail, commercial and residential. Worldwide, Tyco Security Products helps protect 42% of Fortune 500 companies, transportation systems on five continents, 37% of the world's top 100 retailers, over two million commercial enterprises, thousands of students in more than 900 educational facilities, and over five million private residences.

About Bosch Security Systems

The Bosch division Security Systems is a leading global supplier of security, safety, and communications products, solutions and services. Roughly 12,000 associates generated sales of 1.5 billion euros in fiscal 2013. Protecting lives, buildings and assets is our aim. The product portfolio includes video surveillance, intrusion detection, fire detection and voice evacuation systems as well as access control and management systems. Professional audio and conference systems for communication of voice, sound and music complete the range. Bosch Security Systems develops and manufactures in its own plants across the world. Additional information can be accessed at www.boschsecurity.us

The Bosch Group is a leading global supplier of technology and services. According to preliminary figures, its roughly 281,000 associates generated sales of 46.4 billion euros in 2013 (Note: due to a change in the legal rules governing consolidation, the 2013 figures can only be compared to a limited extent with the 2012 figures). Its operations are divided into four business sectors: Automotive Technology, Industrial Technology, Consumer Goods, and Energy and Building Technology. The Bosch Group comprises Robert Bosch GmbH and its more than 360 subsidiaries and regional companies in some 50 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. In 2013, Bosch applied for some 5,000 patents worldwide. The Bosch Group's products and services are designed to fascinate, and to improve the quality of life by providing solutions which are both innovative and beneficial. In this way, the company offers technology worldwide that is "Invented for life."
